**From the Publisher:** Last summer, when we were putting together the schedule for this year's *DX News*, we wound up with a three-week break before this issue, then the next issue in two weeks, and then four weeks after that. I'm sure there was a reason for this, but I cannot remember what it was. In any event, that's our story and we're sticking to it, so we'll be back for our last biweekly issue of the season next time.

We are continuing to print Tim Hall's Border Inn DXpedition report ... but if you want the whole thing, check out the issue of *DXtra News* sent out to electronic DXN subscribers about a month ago, where we had the full report all in one place.

The spring equinox usually produces some good deep Latin American DX, and with all the auroral conditions we've had this year, hopefully we'll have some good reports the next couple of issues. The season isn't over yet!

## From the Archives

**90 Years Ago:** From the March 6, 1935 issue of *DX News*: WLW-700 is scheduled to run a “Four-Star Special” DX test for the NRC on the morning of March 17; if they are at 500 kW it will be the most powerful DX test in NRC history! WLW has been running 500 kW days and 50 kW nights due to complaints of interference from Canada, but is working on a directional night antenna it can use at 500 kW.

**75 Years Ago:** From the March 4, 1950 issue of *DX News*: A total of 28 DX Tests are on the calendar for March 9 through March 27.

**50 Years Ago:** From the March 3, 1975 issue of *DX News*: The number of DX tests is up

significantly this year  
to a ten-year high – 51 arranged by the NRC, 25  
by the Newark News Radio Club (but 14 of them  
were no-shows), and 8 by the IRCA.

**25 Years Ago:** From the March 6, 2000 issue of *DX News*: WMBE (now WZBU-1520) calls itself the “world’s only sturgeon reporting station,” and is very popular with the sturgeon fishing community on Lake Winnebago. (Talk about narrowcasting!)

**10 Years Ago:** From the February 23, 2015 issue of *DX News*: Bruce Conti has been chasing weak unID carriers on 864.000 kHz and 1548.010 kHz at dawn, probably AIR Shillong, India, and 4QD Emerald, Australia, respectively, making it to New England.

## --- NOTES FROM CANADA ---

Jon Pearkins [jon@pearkins.com](mailto:jon@pearkins.com)

As expected, the sale of Bell's smaller market British Columbia stations to Vista, listed below, was approved last week. Although not mentioned in the CRTC decision, it is unlikely that Bell included the brands as part of the purchase agreement, so we can expect all the slogans to change. Among the AM stations, 'Bounce' is currently the most common branding. Most of the formats are also likely to change. Once Vista has fully revamped all the stations, they will likely concentrate on moving all the stations to FM, as former owner Astral was in the midst of doing when they sold the stations to Bell. The only possible exceptions would be CKFR-1150, and especially CJDC-890, if they currently are actively servicing nearby markets that are too distant to receive a city grade FM signal. To simplify future license renewals, the CRTC gave all Bell stations sold to Vista last week a license expiry date of August 31, 2030. The new Vista stations are: **CFTK 590 CFTK Terrace; CKOR 800 Penticton; CKIR 870 Invermere; CJOR 1240 Osoyoos; CFKC 1340 Creston and CIOR 1400 Princeton**, all British Columbia.

As part of the expansion of the CRTC's role, to include on-line broadcasting, there needs to be a consistent definition of Canadian Content that can be applied across both traditional radio stations and audio services available by other means, i.e. – mostly from the Internet. A Broadcasting Notice of Consultation has been issued, titled The Path Forward – Supporting Canadian and Indigenous audio content. Until April 7th, Canadians and Canadian organizations can provide the CRTC with input to help them make better decisions on the subject. Details can be found at <https://crtc.gc.ca/eng/archive/2025/2025-52.htm>.

Other news and a couple of loggings . . .

- 530 CHLO ON Brampton – Despite co-owned CFMB-1280 being no longer licensed to test HD, CHLO still prominently displays the HD logo on their web site. Latest information indicates that CHLO is still running Hybrid HD/IBOC full-time.
- 610 CKTB ON St. Catharines – Noted off the air on February 18 and not reported back on the air yet. On December 19, the CRTC approved the sale of CKTB by Bell Media to Golden Horseshoe Broadcasting Limited.

- 860 CFPR BC Prince Rupert – 2/9 0224 – The station runs single tower, non-directional, with 10 kW day and 2.5 kW night (U1 10000/2500). Reception verified by the CBC. (Dave Gasque – Fort Smith, Arkansas)
- 920 CBKG BC Granisle – This 40 Watt CBC Radio One LPRT of CBYG-FM Prince George has been approved by the CRTC to become CBYG-FM-4 on 105.9 MHz with 106 Watts non-directional at 142 feet below average terrain, no later than January 29, 2027.
- 990 CBQF YT Carmacks – This 40 Watt CBC Radio One LPRT of CFWH-FM Whitehorse has been approved by the CRTC to become CBQF-FM on 105.1 MHz with a directional 550 Watts at 585 feet below average terrain, no later than January 29, 2027.
- 1060 CKMX AB Calgary – It is a big surprise that Bell has found a buyer, *Akash Broadcasting Inc.* of Surrey, for CKMX despite it being off the air for more than 18 months. That means this is likely the last DX Season to catch KYW Philadelphia for those previously impacted by CKMX’s strong signal. CKMX first signed on as CFCN in 1922. Original owner William Walter Westaver Grant began in Halifax with his own radio station in 1919.
- 1280 CFMB QC Montréal – Is no longer licensed for HD. It has been several years since they announced their testing of Hybrid HD/IBOC, with no recent updates on their progress. Unless this was a clerical error, this appears to be the end of HD plans for CFMB.
- 1290 CFRW MB Winnipeg – *Akash Broadcasting Inc.* negotiated a deal to buy CFRW and CKMX subject to CRTC approval after the upcoming March 27 hearing to consider the sale. The CRTC has emphasized to *Akash*, which owns ethnic stations CJCN-FM Surrey and CKER-FM Edmonton, that CFRW and CKMX have a standard AM license which limits non-English programming to 15% of the Broadcast Week. That translates into 18.9 hours per week PLUS midnight – 6:00 AM seven days a week. Reading in between the lines of *Akash’s* response, it appears that once they get CRTC approval, they will apply to change the licenses of both stations to allow full-time Ethnic programming. CFRW began in 1963 on 1470 as CJQM with a very early IGM stereo automation machine, rumoured to be Serial Number 000005, used mainly on CJQM-FM. When CJOR Vancouver owner Jim Pattison bought the pair of stations in 1970, and changed their call letters to CFRW AM & FM, he had no interest in automation, so previous owner CHQM tried to recover their costs by shipping the automation machine to Vancouver and using it for CHQM-FM. Despite immediate failure trying to get the AM announcer to also run the automation machine for FM, one of their board operators just could not figure it out, so he was fired and replaced by a UBC Computer Science student. As for the manufacturer, IGM, they were owned by KGMI-790 Bellingham WA, with the “GMI” a rearrangement of the IGM name, which stood for International Good Music, with IGM’s first automation machine used for KGMI-FM.
- 
- 6030 CFVP AB Calgary – This 100 Watt shortwave repeater of CKMX-1060 is not mentioned in the CRTC application by *Akash Broadcasting* to buy CKMX from Bell.

--- U.S. STATION NEWS ---

- 660 WXQW AL Fairhope – 2/15 0743 – Continues simulcasting with WGOK, Mobile AL (despite News/Talk format listed). Parallel air checked, both. WATV, Birmingham co-channel on the 900 kc/s channel. (TK-FL)

--- UNIDS ---

- 880 unID - 2/8 0718 – Southern Gospel, mostly with solo piano accompanying. Fade down to unusable level. KJOZ, Conroe TX with Spanish Christian vocals dominating before. Again there at 0640 on 9 Feb with slow, white Gospel. Future checks afterward with no trace. Could it have been WAPC (formerly WAMI, Opp, Alabama) with a brief license renewal activation from Opp (D1 1000 Watts)? Call change is to WAPC, and to be relocated to Jackson’s Gap, Alabama at a whopping D1 13,000 Watts, and well over 120 miles NE of the former WAMI Opp site (visited a few years ago). (TK-FL)
- 1060 unID – 2/21 0706 – Orchestral ‘Star Spangled Banner’ – seemingly not WQMV and not heard via streaming. (TK-FL)
- 1580 unID – 2/6 0105 – Someone underneath CKDO giving tornado warnings. Difficult to understand, but two of the areas named seemed to be “Elkhorn” and “Bagwell”. (SD-MN)

1600 unID – 2/17 0800 – “AM 1600 WB?? . . . A Cumulus Station” by woman. Stumped in South Milwaukee! (JJR-WI)

### --- TENTATIVE ---

530 CHLOt ON Brampton – 2/5 0335-0615 – Fair-to-Poor, fading from armchair quality-to-non-existent, with back-to-back-to-back piano/instrumental versions of popular songs. Vocals in undetermined language heard on occasion. Unable to make out an announcement by female at 0530, which was under the noise. Tentative, but being heard now (to 2/21/25) daily to around 0600, then gone. 1195 miles. [BH-TX]

1060 KDYL UT South Salt Lake – 1/27 0258 – Mexican music here normally means KDYL forgot to switch to night power. But exceptional Mexican conditions (two Mexicans heard while nulling usually unnullable CBW-990 Winnipeg MB) makes XECPAE or XERDO more likely. All alone with no sign of regular KYW Philadelphia PA. (JP-AB)

### --- DX LOGGINGS ---

550 KFYZ ND Bismarck – 2/2 0744 – “K-Fire 5-50, the legendary voice of the Northern Plains” into a Fleetwood Mac song. (JJR-MI)

570 KVI WA Seattle – 2/18 0003 – Strongest signal ever heard, with nice call letter ID, in exceptional DX conditions towards Seattle (see KTTH-770 below). Also good to Portland but mediocre to Vancouver, BC. Normally impossible to hear anything on 570 thanks to local CHAH-580. (JP-AB)

620 KMNS IA Sioux City – 2/2 1836 – “. . . time out on Fox Sports 620-KMNS” into ad. WTMJ nulled. (JJR-MI)

640 WCRV TN Collierville – 2/10 0820 – Adrian Rogers with Bott REL. Worked out good! WMFN nowhere! (JJR-WI)

660 WMIC MI Sandusky – 2/23 0805 – WMIX-WTGV morning news at 8:05. Alone. (JJR-MI)

660 WLOY VA Rural Retreat – 02/11 2240 – Oldies, mixing with XECPR’s Radio Chan, fading in and out in the background. One slogan heard, “Oldies . . . 93.3 FM”, nothing else fits format and FM. Beatles, Great Balls of Fire, etc. **New, for Virginia #05** from the Appalachians not far from Tennessee. (EB-AL)

680 WPTF NC Raleigh – 2/16 0749 – North Carolina chatter, including North Carolina state pensions on Sunday morning PSA programming. Alone. (JJR-WI)

690 WJOX AL Birmingham – 2/16 0747 – Alabama travel and other Alabama PSAs. Alone, steady. (JJR-WI)

690 WNZK MI Dearborn Heights – 2/23 0803 – Talking of WNZK, then promoting “WNWI, 1080 on your radio dial.” (JJR-MI)

690 CBKF1 SK Gravelbourg – 2/3 0805 – Alone, with FF. Only fit. The usual here is CKGM. WTMJ nulled. (JJR-MI)

710 KIRO WA Seattle – 2/6 0502 – Briefly popped up above the dominant mix of KSPN and KFIA with on “. . . 7-10, ESPN” by female. 50 kW pointed in the opposite direction of me at night at 993 miles. **New! Washington #25 from the Hacienda!** (SB-CA)

730 WZGV NC Cramerton – 2/2 0749 – ESPN arguing, etc. “. . . the Game”. Alone, no CKDM, which was in earlier. (JJR-MI)

730 WPIT PA Pittsburgh – 2/15 0815 – “. . . use code WPIT at MyPillow.com. No CKDM. Alone, steady. (JJR-WI)

740 KRMG OK Tulsa – 02/03 0631 – ‘Chevy’ ad, weather: high 78, Tulsa police, KRMG Morning News. Strong today. (EB-AL)

740 CBX AB Edmonton – 2/3 0803 – “CBC” mentions in newscast. Have heard this a bit better. No CFZM, KNFL etc. (JJR-MI)

740 CFZM ON Toronto – 02/04 0915 – Clear signal with oldies. A mystery for a while until ID: “The Original Greatest Hits – Zoomer Radio”. Toronto unexpected at this time of day, but I’ll take it! Heard again on 2/20 @1919 booming in on caradio with Rock music, ads with “dot cee a” and for events sponsored by Zoomer Radio, ‘12,000 people in Toronto experience homelessness’. “AM 7-40 Zoomer Radio – The Original Greatest Hits”. Best Canadian here by far. (EB-AL)

770 KATL MT Miles City – 2/2 0728 – Popular hits in, with assumed KKOB. No WABC at all. (JJR-MI)

770 KKOB NM Albuquerque – 2/2 0730 – Red Eye Radio – ‘Million Mile Safe Drivers Club’ mention. In/out. “News Radio 96.3”. (JJR-MI)

770 WAIS OH Buchtel – 2/19 0805 – ‘Amazing Grace’ back-announced in fade up over WVNN. Christian music. (JJR-WI)

- 770 KTTH WA Seattle – 2/18 0010 – Mostly all alone, but some fluttery fades, while nulling CHQR Calgary, Alberta, with antenna E-W. Finally confident that it is KTTH, thanks to the familiar voice and delivery of ‘The Mark Levin Show’, confirmed for that time by the KTTH web site’s Program Schedule. Finally able to put them in the log book. No sign of regular KATL Miles City, Montana. **(JP-AB)**
- 780 WJAG NE Norfolk – 2/2 1827 – ‘Brownfield’ (Farm news) promo and calls mentioning ‘105.9’. WBBM easily nulled. **(JJR-MI)**
- 780 WAVA VA Arlington – 2/2 0700 – WAVA ‘begging’ another broadcast day. Full data sign-on wiping out WBBM! **(JJR-MI)**
- 800 WVHU WV Huntington – 2/16 0834 – Long tones: weather alerts for West Virginia and southeast Ohio. “. . . take shelter . . .”. Alone. **(JJR-WI)**
- 810 WSYW IN Indianapolis – 02/05 0658 – Spanish ads mentioning “Indianapolis” and “317” phone numbers. Spanish Hip Hop, matching WSYW webstream. Fair, in peaks, getting unstable. New, for Indiana #11. **(EB-AL)**
- 880 KLRG AR Sheridan – 02/02 0812 – Rock music, ID: “Thank you for choosing Arkansas Rocks”. Fair with fading. **(EB-AL)**
- 880 WHSQ NY New York – 02/03 0557 – Gambling ad. Traffic on “8-80 ESPN New York”. Legal ID: “WHSQ and WCBS-FM-HD2 New York”. Strong. **(EB-AL)**
- 880 CHED AB Edmonton – 2/5 0117-0132 – Already off air when I first checked, back on at 0121:30, off again at 0122:55 then back on at 0126:55 until I gave up. Initially CKLQ Brandon, Manitoba was strongest but easily nullable, leaving KRVN with signs of a third male talk station, likely KJJR Whitefish, Montana. CKLQ gradually faded, with continuous C&W. No IDs heard, but KRVN sounded like Rich Valdes with America at Night. As for CHED, could not tell between their normal 50 kW night pattern, 10 kW auxiliary transmitter or emergency 5 kW non-directional emergency night-licensed power. First time noted off the air in about 10 years. **(JP-AB)**

- 1290 KAZA CA **Gilroy – 10/27 0817** – Vietnamese talk, eventually overtook KMMM ... a battle of perennially "compliance-challenged" stations. - 1340 KVOT NM **Taos** – 10/27 2158 – Fighting KCQL (as they were on most wires all weekend), with “Contemporary Christian” music (placed in quotes because most of the songs they play fail to live up to both of those adjectives!), ID and slogan “The Voice of Truth.” 497 miles.

When they do ID, they usually give the incorrect city-of-license (Riverside). 387 miles.
- 1350 KTIK ID Nampa – 10/26 2058** – On top of channel, with pregame show for Idaho Steelheads minor league hockey. Still audible after power cut at top-of-hour. 333 miles.
- 1350 KBRX NE O’Neill – 10/25 0559** – Under suspiciously loud KABQ, with top-of-hour ID including translator K260DO-99.9. Listed 44 Watts nights. 837 miles.
- 1350 KABQ NM Albuquerque – 10/24 2159** – In the soup, with ID and iHeartRadio promos. The Fox Sports feed allows numerous optional “hooks” for iHeartRadio promotional content, so this station and KCQL-1340 are little more than iHeartRadio promo stations. Listed 500 Watts nights, but they were all over this year’s recordings. 489 miles.

This station has been running their 5 kW day power 24/7 for over a year. Listed 200 Watts nights from yet another temporary site on latest revised STA. - 1370 KSUM MN **Fairmont** – 10/25 2114 – Faded up for promo and ID before resuming Country music. Almost alone on the EENE wire, but barely above the noise. Pretty rare here, despite this channel being pretty wide open. 1059 miles.

- 1390 KENN NM **Farmington** – 10/25 2152 – Weak signal, with high school football: Rio Rancho Rams @ Farmington Scorpions. I think they must have been running day rig at night in recent years, but not this year. Coincidentally, the big noise spurs I have had in recent years on 1382 and 1398 (which I had originally guessed were coming from KHOB until observing that the spurs continued after KHOB was gone) are gone too. 360 miles.

## PAN-AMERICAN DX

- 550 **CUBA** *R.Rebelde*, Pinar del Río FEB 22 0648 – Wobbler interference to U.S. pileup, sort of like wind whining rapidly. Now similar sound against WWL on 870, where the wobbling had been much slower. Nothing on 1040 now. [Hauser-OK]
- 590 **MEXICO** XEPH México, CMDX FEB 20 0600 – With local WEZE Boston cancelled; choral national anthem, presumed XEPH. [Conti-NH]
- 660 **MEXICO** XECPR *R.Chan Santa Cruz*, Felipe Carillo Puerto, Q.Roo FEB 15 1133 – Local level at tune-in with an amusing instrumental Mexican cover of ‘Ghost Riders In the Sky’ then slogan ID, calls into a Mexi-tune. Then – shockingly – a very long, canned English ID voiced by a young lady with a very, very heavy accent over a steel pan music bed, with slogan ID and mention of the station physical address (not fully copied, but portions seemed to match Emiliano Zapata 77229, Felipe Carillo Puerto, Quintana Roo). Close to the Belize border, so no doubt there’s less a Mexican vs. Belize/Caribe Miskito desire here. I drove solo rental car not too far north of this town ages ago, but the speed bumps and Mexican soldiers with M-16s and my crappy Spanish detracted me from going much beyond, much as I wanted to go to Belize. [Krueger-FL]
- 660 **MEXICO** XEFZ, *Radio ABC Deportes*, Monterrey, NL FEB 19 1033 – Slogan ID, ad for something in U.S. dollars, into Mexi-tunes. [Krueger-FL] FEB 20 0733 – ID break in Mexmusic: “XHGBO, 92.1 y 660 Monterrey, ABC Deportes.” Did not hear true MW call mentioned, XEFZ. FEB 22 0700 – Full ID for XHGBO 92.1 and this time I do also hear MW ID as XEFZ 660, *ABC Deportes*, Monterrey. [Hauser-OK]
- 660 unID FEB 21 0733 – Spanish in mixture, can copy only a partial FM frequency starting with 91. No fits in IRCA Mexican Log; and there is only one USA 660 Spanish in NRC AM Log, Oregon. [Hauser-OK]
- 730 **MEXICO** XESOS *La Ranchera*, Agua Prieta, Son. FEB 12 0559 – “La Ranchera” during brief XEX fade; briefly fair; Son. #3. [Jeziorski-QRO]
- 760 **CUBA** *R.Progreso*, Guane//Mayarí Arriba FEB 22 0500 – Under WJR; instrumental national anthem parallel 640 kHz. [Conti-NH]
- 800 **MEXICO** XEERG Ojo de Agua, NL FEB 10 0754 – For the record, still extreme distortion interfering with KQCV. I first reported this on SEP 17, 2024, as unID, soon traced to XEERG as I explained then in great detail. [Hauser-OK]
- 810.56 unID FEB 10 0440 – Het upon 810 WHB. No 9/kHz TA carriers audible now. Still there at 0735 UTC, 810.56 estimate. Nothing in mwoffsets this far off. Not there in daytime, 1940 UTC check. Tim Hall replied, “I had this signal in October at my Nevada-Utah border DXpedition. It varied from about 810.46 to 810.555, and was present on at least 4 of my wires, ranging east/northeast (Montreal) to southeast (Argentina). So far haven’t noticed it on recordings after about 1000 UTC.” FEB 11 0005 – Unheard direct, maybe too early. Still not around 0200, nor into several Latin American and U.S. SDRs. Still not by 0255 direct. Maybe sporadic, since Tim had it a few months ago. FEB 12 0708 – Unheard earlier, but by 0708 carrier weakly about 810.56 kHz. This time tried to DF it with the D808, got roughly 100/280°, i.e. slightly clockwise from east/west – that would eliminate Latin America, Bahamas, but inside U.S. or possibly West Africa, Southwest Pacific. Someone suggested Tokyo, far off my DF, and at 1700 UTC, Tokyo SDR had FEN on frequency. In next few minutes check SDRs in SC, GA, AL, MS and TN, and if any signal on 810, none way off. My initial FEB 10 log too early for anything from East Asia or Pacific. This not necessarily would come from any known 810 station. FEB 13 0300+ – 810.61 kHz mystery carrier search, direct once or twice an hour starting 0300, nothing until finally at 0658, measured as above slightly higher than previously. Then from 0700 hunting via various remotes, starting with Canary Islands – nothing. Nothing across southeast USA; FL, GA, SC, AL, TN. I suspected it’s really coming from the opposite direction, so tried remotes in NM, CO, ND – nothing, until: Corinne #1, northern Utah! Of course the main 810 signal in the west is KSFO ex-KGO. This shows 30 Hz above 810.600, i.e. 810.63 kHz. Kept checking other remotes including WA until 0730 but not found and by then no longer heard direct. May have gone off again much earlier. Greg Hardison reported the 810+ anomaly on the Allenspark, CO SDR, but couldn’t pull any audio peculiar to it. Suggested KBHB, Sturgis SD, U1 25000/60 watts. My previous bearing approx. 280° would have to be wrong. Or course that’s more toward KSFO, which sounds normal on

810.00 kHz. It would have to be putting out a spur additionally on the plus side, but I doubt that. Due to KSFO dominance not many 810s in western USA: only CO, NM, SD, WA. FEB 15 0641 – Carrier audible again against 810.00 WHB, not earlier. DF roughly 100/280° to 105/285° from Enid. Utah #1 remote which heard it before is hearing it again, but not enough to lock onto it separately from KSFO. At final check direct 0705, more like 810.59 kHz. Greg Hardison and Ron Howard checked CO remote for KLVZ Brighton, found it not off-frequency, but could IBOC have something to do with this? FEB 20 0710-0748 – 810.58 hetting 810.00 WHB is back; had not heard it for a few nights since FEB 15. This on east/west long wire into NRD 545, but I can also detect it on handheld D808, tuned to 810 USB to DF: again approx. 100/280°, or slightly more clockwise. FEB 23 0430 – Carrier hetting 810.0 stations is in again, DF approx. 100/280° to 105/285°. At 0510 switched to Corinne, northern Utah SDR where it's also quite audible on 810.58; can't make out any modulation. I swiftly invited others to hear it via Utah; but Walt Salmaniw, BC and Mark Connelly, MA both reply they detect nothing direct. I still have it via Corinne at final check 0713 UTC. Probably domestic but unknown for sure. [Hauser-OK]

- 840 **CUBA** CMHW *Doblevé*, Santa Clara FEB 22 0500 – Over/under WHAS; choral national anthem, canned ID, “Esta es Doblevé...” [Conti-NH]
- 870 **CUBA** *R.Reloj*, multiple locations FEB 8 0744 – Wobbler and hardly any signal from WWL, as often the case, strange. U3 50/50 kW, as the main 870 clear channel station, could be U1, but to avoid wastage over the Gulf of Mexico is directional with null thataway, major lobes favoring east/west to the north side, and should own 870 at night here. FEB 12 0734 – Wobbler vs very little signal from WWL, which if at full 50 kW blast would easily overcome it, like WHO can on 1040 kHz. FEB 20 0740 – Wobbler vs WWL which now has a sufficient if not strong signal. [Hauser-OK]
- 950 **MEXICO** XEMAB *Globo FM 101.3*, Ciudad de Carmen, Camp. FEB 2 0201 – Not logged here since 2021, now heard almost nightly battling KPRC. [Jeziorski-QRO]
- 970 **MEXICO** XEJ *La J Mexicana*, Cd. Juárez, Chih. FEB 12 0736 – Break in Mexmusic at tune-in, “Usted y La Jota Mexicana, 970.” The usual one on 970 rather than flagship of *R.Fórmula*, XERFR which is twice as far. Note to editors: please do not “correct” my spelling. Mexico with a J is an alternative, and certainly fits with branding of this station. [Hauser-OK]
- 1000 **MEXICO** XETAC *R.Cañon*, Tapachula, Chis. FEB 12 0400 – Full ID for 760 XEABC; fair under XEOY; Chis. #6. [Jeziorski-QRO]
- 1040 **CUBA** *R.Mayabeque*, Güines FEB 10 0749 – Wobbler under WHO, but not vs 870 WWL at the moment. Presumably the only listed, *R.Mayabeque*, Güines, 10 kW. I guess at local range it's a huge loss, no program modulation. [Hauser-OK]
- 1070 **GUATEMALA** TGD *La Voz de Occidente*, Quetzaltenango FEB 15 0200 – List of events celebrating station's 78th anniversary, then TGD ID; good; Guatemala #5. [Jeziorski-QRO]
- 1141 **CUBA** unID FEB 20 0742 – JBA het against 1140.0 stations, presumed to be from Cuba; it was once necessary to jam Miami's 1140. [Hauser-OK]

### INTERNATIONAL NEWS

**UNITED KINGDOM:** *TalkSport* has been granted permission from Ofcom to turn off seven of its 18 transmitters. The move will reduce its national AM radio coverage from 92% to 88.9% of the UK adult population. The transmitter sites to close are; Clipstone (Nottinghamshire), Duxhurst (Surrey), Lisnagarvey (in County Antrim, Northern Ireland), Lydd (Kent), Stockton (Durham/North Yorkshire), Southwick/Brighton (West Sussex) and Rusthall (Tunbridge Wells). Reasons given by *TalkSport* for these changes include declining listenership to its AM service as people turn to alternative platforms, considered against the ongoing viability of each transmitter site. The 11 sites which will remain are; Brookman's Park (Hertfordshire), Droitwich (North Worcestershire), Moorside Edge (West Yorkshire), Westerglen (Falkirk), Washford (Somerset), Fareham (Hampshire), Dartford Tunnel (Kent), Wallasey (Cheshire), Boston (Suffolk), Wrekenton (Newcastle) and Postwick (Norfolk). *TalkSport* will remain available nationally on DAB and other platforms. ## Jon Pearkins, Edmonton AB

DX Openings have always intrigued me, especially since every one is different, or so it seems. The most recent example was February 18th just after midnight EST. The highlight was KTTH-770 Seattle WA with occasional fades, otherwise completely eliminating CHQR-770 Calgary AB with antenna East-West. Possible signs of them previously but nothing definite until now, with the syndicated The Mark Levin Show matching up to their web site Program Schedule.

I would not even have checked 770 if I had not heard KVI-570 Seattle WA with a strong signal on a frequency normally totally impaired by local CHAH-580. Most of the Seattle area stations had extremely strong signals, with one notable exception. KRKO-1380 Everett WA is usually unnullable but they were fairly weak, with KOTA-1320 Rapid City SD dominant.

Vancouver BC stations were weaker than normal but KEX-1190 Portland OR was all alone with no sign of CFSL Estevan SK, which normally dominates 1190 with little or no sign of KEX.

Which is why I am always on the lookout for unusual DX conditions where strong signals exist from small geographical areas. Sometimes very small, like my High Noon reception of both Nampa ID stations back in the late 1960s from Vancouver. No other usual stations were heard.

Finally, I should mention that DX Openings are bi-directional, in my experience. The best example of that was here in Edmonton in 2001 when KEX-1190 Portland OR was loud and clear on the car radio at High Noon one Winter Saturday, as well as the major Seattle stations. I e-mailed a Seattle DXer and he logged a lot of major Alberta stations, at High Noon his time, and even got CBK-540 Watrous SK. I'm still kicking myself for not checking for KFBK-1530 Sacramento CA.

On a different topic, but still related to KTTH, I had previously been skeptical of Male Talk being them, as they have a Null towards Calgary at night that translates into just over 500 watts. But it is a very tight null. Edmonton is both North and West of Calgary. A closer look at the night pattern tells me that an equivalent of more than 5 kW omni-directional is sent in my direction.

## Martin Foltz, Sarasota FL

Veries: none. I celebrated my third anniversary of moving to FL. Looks like a couple locals changed formats. 620 WDAE switched to Fox Sports Radio and 1150 WTMP switched to ESPN. WTMP has had 5 formats since I moved here. Update on the LED bulbs and noise. I have 5 sets of fixtures that have the chandelier LEDs in them; 2 are on dimmers and 3 on switches. The bulbs on switches are quiet. The bulbs on dimmers cause noise. Other difference is that the ones on dimmers have more bulbs (5 & 8 vs. 2 or 3). I unscrewed 4 of the set of 5 and the noise went away with 1 bulb. So, it's probably the dimmers. These LEDs are dimmable.

My Sony 2010 repair seems to be working, no issues. I head a new state, KSL in UT, and sent them a reception report. Station #100 reported from FL. Two nice emails from WBBR in NY. One forwarded my report to the guy in charge of "QSL cards!" Hoping for that one. 73's Martin

## Remembering John Bryant

February 9 marked the 15th anniversary of the passing of John Bryant, a well-respected and admired member of the DX community. Many who knew him posted tributes online in the IRCA group online at Groups.io. Two well-known DXers, Mark Connelly and Guy Atkins, gave permission to have their remembrances re-posted in the Musings column.

From Mark:

"Even though I have concentrated primarily on MW, I found all the John Bryant articles in Proceedings fascinating reads. The late '80s still had much to hear on shortwave, especially the tropical bands where back-of-the-barn peanut whistles proliferated throughout Central and South America, Africa, Asia, and the South Pacific. These stations offered a unique palette of entertainment possibilities in music, commentary, and religious content. There is little to compare in the current over the air broadcast scene. An expert on streaming would be needed to ferret out similar options now.

John had the knowledge breadth of a polymath or "Renaissance man." His specialty was architecture and much of his interest in that pointed to Asia. He knew Indonesia inside and out - geography, customs, food, music etc. This informed his reporting of the (then) many tropical band outlets in that region: stations considered highly prized catches by DXers around the world because of the cultural content and often very low power levels.

Despite having enough knowledge to teach doctoral level courses, John did not write in a "stuffed shirt" academic fashion. DXing on any band was a fun experience to him and the kid-like enthusiasm showed.

Fine receivers were savored for their industrial design merits, the look, the feel of the controls, the station grabbing qualities, and sound fidelity. Comparisons to fine cars, musical instruments, choice wines etc. enlivened the discussion.

As the shortwave scene started to falter, John threw his considerable talent into medium wave. His experiences with the Kaz Delta antenna and phasing units added much to the hobby's knowledge base.

The matching transformer tests he and Bill Bowers did are still often linked-to in antenna articles.

He got the Ultralight thing going, then Gary and a number of others carried the torch from there.

One can only imagine how much more he would have given us over the past 15 years as online receivers, spectrum capture SDRs, new ultralights with DSP, and FSL antennas gained prominence. Sort of like 'what would we have from 15 more years of Buddy Holly if that plane hadn't gone down.'

As the outpouring of emails shows, John, you are missed. R.I.P. at that Hammarlund in the sky."

Guy responded:

"Mark Connelly mentioned the loss of Buddy Holly. Interesting you should make note of him, Mark, as Buddy Holly was John's most favorite musician! I learned of that during the long, long drive back to the States after the 2007 Haida Gwaii DXpedition. He had some Buddy Holly albums on his phone which we patched into my car's sound system. Ever the educator, John supplied historical and musical context to nearly every song as we passed waypoints such as "108 Mile Ranch" and "100 Mile House" along Highway 97 through BC.

Since then I always think of John when hearing a piece by Buddy Holly and the Crickets."

And Mark replied:

"Great to hear of the appreciation of one genius, John Bryant, for another, Buddy Holly.

How would Buddy Holly have interacted with the many singers and groups coming after him, ones that paid homage not just by covering his material but adopting elements of his music and youthful outlook? Right away I think of Everly Bros., Bobby Vee, Tommy Roe, Beatles, Hollies, Searchers, Bob Dylan, Byrds, Tom Petty, R.E.M., Gin Blossoms, and a little known band from Wales called Really 3rds. <https://www.youtube.com/watch?v=JoqzPKYoJmQ>, That one's straight out of Buddy's style book, 20+ years after his passing.

Buddy Holly would have created new material both adding to the repertoires of other performers as well as drawing in influences from them.

Back to John Bryant, he would also be adding to and drawing from the riches of others' work in his many spheres of knowledge. DXing would, of course, be one of them. How would he be using social media, something that was just barely out of the gate 15 years ago? I'd already mentioned new SDRs, ultralights, and antenna developments. He would be drooling over all the DXpedition reports - northern Scandinavia, Newfoundland, PEI, Lubec ME, Cape Cod MA, NV/UT desert, Rockworks, Grayland, Masset and so on. He'd be riding some of those king-sized auroras like the Silver Surfer. Things like identifying noise-plagued music audio with Shazam would have blown his mind. And don't even get me started on Co-Channel Cancellor! He'd have that down as the greatest thing since sliced bread.

We're talking of two supremely talented lives cut short way too soon. There was so much more that could have been added to our world. But they both did a heckuva job while they were here.

Lubbock, TX and Stillwater, OK have reasons to be proud."
